MONOXIDE

MOLECULES IN SPACE

OBSERVATIONS

EXOMOL THEORY

RESULT!

PROBLEMS?

VANADIUM MONOXIDE

A NOTE ON O₂

@EXOMOL

O₂ is a weak absorber of infrared and visible light (this is why it is not a greenhouse gas)!

MOLECULES IN SPACE

OBSERVATIONS

EXOMOL THEORY

RESULT!

PROBLEMS?

VANADIUM MONOXIDE

EXOMOL METHODOLOGY

@EXOMOL

Finding the **frequency** and **intensity** of the transitions of small hot molecules in astrophysical environments using:

MOLECULES IN SPACE

OBSERVATIONS

EXOMOL THEORY

RESULT!

PROBLEMS?

VANADIUM
MONOXIDE

THE CORE OF ALL SPECTROSCOPY

@EXOMOL

- ▶ Initial Energy Level
- ▶ Final Energy Level
- ▶ Transitions Between Them

MOLECULES IN SPACE

VANADIUM MONOXIDE

THE RESULT: LINE LISTS

@EXOMOL

The screenshot shows the ExoMol website interface. At the top left is the ExoMol logo, and at the top right is the UCL logo. Below the logos are navigation tabs for 'About', 'Data', and 'Publications'. A 'Login' link is located in the top right corner of the main content area. The central heading is 'Molecule Search'. Below this heading is a search prompt: 'Please select a molecule below or search for a molecule here:' followed by a search input field and a 'Search' button. The main content area is divided into four columns of buttons, each representing a category of molecules:

- Metal Hydrides:** BeH, ScH, AlH, VH, NaH, MgH, LiH, NiH, FeH, CaH, TiH, CuH.
- Other Hydrides:** NH, CH, SH, OH.
- Metal Oxides:** CaO, MgO, TiO, SiO, AlO.
- Other Oxides:** SO, CO, NO.
- Triatomics and Larger Molecules:** CO₂, H₂CO, SO₃, HNO₃, H₂O.

VANADIUM MONOXIDE

Take home message:

- ▶ These line lists often take PhDs.
- ▶ They are useless if they are not used.
- ▶ So anything we can do to maximise their usefulness to you - let us know!

OBSERVATIONS

EXOMOL THEORY

RESULT!

PROBLEMS?

VANADIUM
MONOXIDE

Are they caused by the ExoMol Line Lists?

Questions to ask:

1. Is it a big molecule?
2. Is there little experimental data?
3. Does the molecule contain a transition metal?
4. Is it an electronic transition?
5. Is it a high energy transition?
6. Is your error at high resolution?
7. Is the initial state very high in energy?
8. Is your line list not from the ExoMol project?

If **Yes**, then it could be the line list.

If **No**, then it is probably the astrophysical model.
